EXPERIENCE

Claro AI

May - July 2024

Full-Stack Engineer Intern

Berlin, Germany

- Implemented **authentication workflows** and **LLM analytics dashboard components** by developing a full stack solution with **React/Next.js** frontend and **Node.js** backend, improving user security and usability.
- Built **RESTful APIs** and **backend services** with optimized data retrieval, and designed **scalable data models** for customer chat history and CSV file uploads, ensuring reliability at scale.
- Developed **interactive dashboards** with **data visualization** and **reporting features**, delivering actionable insights that enhanced decision-making for clients.

Google Developer Student Club NIT Agartala

Aug 2023 - May 2024

Web Development Team

- Organized workshops, events, and tech talks fostering skill development and knowledge sharing within student community
- Mentored peers, engaged in community outreach, and hosted hackathons showcasing technical expertise

EDUCATION

National Institute of Technology Agartala

Aug 2022 - May 2026

Bachelor of Technology in Electronics and Communication Engineering

Agartala

PROGRAMMING SKILLS AND TOOLS

Proficient: Python, JavaScript, React, Node.js, MongoDB, SQL, Git, RESTful APIs, FastAPI, WebSockets, Firebase

Familiar: Docker, TypeScript, AWS, Next.js, Express, Django, CI/CD, Redux, C++, Postman, OpenCV, Assembly, Shell Scripts

PROJECTS

AI Task Manager Agent | *FastAPI, GPT-4o, Notion API, Python*

[GitHub](#)

- Engineered a **conversational AI assistant for task management** by integrating **GPT-4o** with **Notion API**, enabling real time task creation, updates, and retrieval through a chat interface
- Architected the **backend using FastAPI** with **persistent WebSocket connections**, ensuring low latency, bidirectional communication between users and the AI agent.
- Developed a tool based reasoning system for the **LLM** by wrapping Notion API calls as distinct functions, empowering the agent to autonomously translate natural language commands into specific database actions.
- Implemented **in memory conversation history** to maintain context across sessions, resulting in more accurate and human like interactions.

Hungry for E-Waste - SIH 2023 Finalist | *MongoDB, NodeJS, Express.js*

[GitHub](#)

- Developed an e-waste recycling platform that helps users locate nearby recycling facilities and learn safe disposal practices, leveraging **OpenStreetMap API** for **geolocation and interactive maps** to improve accessibility.
- Built **RESTful APIs** with **Node.js**, **Express.js**, and **MongoDB** to manage users, facilities, and credit transactions
- Designed a **device input system** to estimate recoverable precious metals and award recycling credits, encouraging eco friendly disposal
- Secured **2nd place in Smart India Hackathon 2023** (MHRD track) among **500+ teams**, validating solution impact and scalability

EReSA - Robotic Arm with Object Detection | *Arduino, Python, OpenCV*

- Developed an object detection pipeline using OpenCV with pixel density and contour analysis, enabling accurate recognition of target objects

MISCELLANEOUS

IIT Gandhinagar - SIH 24

May 2024

Mentor for 300+ students in Smart India Hackathon 2024

Gujarat

Smart India Hackathon Runner-Up 2023

Dec 2023

Top 1,300 finalist among 52,000 teams

Amravati, Maharashtra

ISRO IIRS, Dehradun

Oct 2021

Summer Workshop in Remote Sensing and GIS
